

## Correction for Echocardiography in Provider Manual

**Update:** The Department of Health Care Services (DHCS) has identified a claims processing issue affecting certain claims billed with CPT-4 code 93355 (Echocardiography, transesophageal for guidance of a transcatheter ...) due to policy listed in the Cardiology section in the Part 2 manual. CPT 93355 is a non-split billable code and is therefore billed without a modifier and not reimbursable with Modifier TC.
