

Multi-Function Ventilator

Correction: A previously published Medi-Cal Update article titled “Multi-function Ventilator a New Medi-Cal Benefit” contained errors that may have caused confusion for some providers when billing for HCPCS codes E0465 (home ventilator, any type, used with invasive interface...), E0466 (home ventilator, any type, used with noninvasive interface...) or E0467 (home ventilator; multi-function respiratory device...). This has been corrected and published in a new article.
